Use a SW610-TA controller!  
Lighted display mimics  
Commander's actions.

**Whether in pursuit, or controlling traffic, the Commander has you covered.** Available in two different models [XL6 & XS4], and 4 different lengths per model, the Commander fits any application. The XL6 model features 6 diode light heads with linear optics, the XS4 model feature 4 diode light heads with linear optics behind a fluted lens for a unique effect unlike any other. Use the 2 and 4 head warning models in the rear deck, on a push bumper, or in side windows, the possibilities are endless. The 6 & 8 head models come equipped with warning & traffic patterns, put one in the rear deck and never worry about being visible to oncoming traffic. INDEPENDENT END FLASHER MODELS AVAILABLE, SUBSTITUTE "A" WITH "F" (CLTF). **XL6 MODEL AVAILABLE IN DUAL COLOR CAPABLE VERSION!**
