

DUAL COLOR Torrent Lightbar

Patented color changing technology, often imitated, never duplicated.

Claims of "dual / duo" color fall short when compared to Brooking's patented dual color technology. Our method actually CHANGES the color of the diode, others ADD more diodes which of course increases price. Change from warning colors (red or blue) to amber for traffic control, it's never been easier!

Sleek, strong aerodynamic design reduces wind resistance & improves gas mileage.

Aesthetics are important, so are durability and output, the Torrent exceeds market standards in these categories. An extruded aluminum chassis provides rigid support and shock absorption without sagging / bending, while the low profile design aids in decreased wind resistance, improving gas mileage and vehicle performance.

Customize your bar(s) to meet your exact specifications.

The Torrent is available in many different lengths and configurations. Clear lenses are standard, colored lenses are also available at no extra charge. Ask your local dealer for a Torrent build sheet and get started, it's never been easier to get exactly what you need.

5 year limited warranty

Features

Specifications:

Available lengths: (in inches)
40, 44, 49, 54, 59

Dimensions:
Width: 12.4"
Height: 2.6"

Operating voltage: 12 VDC
Avg. current: 16A @ 12.8 VDC
Max. current: 32A @ 12.8 VDC

Harness:
Power: 15' / 14 AWG x 4 pcs.
Function: 15' / 22 AWG x 16 pcs.

Features:

Extreme linear optics (all heads)
Halogen or LED take downs & alleys
LED take down options are dual 6 diode or dual 9 diode. LED alleys available in dual 3 diode model.

3 mode pursuit programmability

User selectable warning / arrow patterns, OR create your own!

LED colors: Amber, Blue, Red, White

Lens colors: Amber, Blue, Red, Clear. Colored lens not possible in rear color changing positions

Mounting:

Steel: Adjustable, Flat Narrow, Flat wide
Composite: Standard

Vehicle specific strap kits

Certifications:

SAE J845, J595, J575
