

Legion Lightbar

ReFlector style inboard heads

D-Fuser style corners

The Legion is an affordable option when budgets are tight!

A high performance, competitively priced option with choice of two different types of optics. For the most cost effective solution, we recommend the 3 diode ReFlector type modules in the inboard positions, and the D-Fuser type in the corner positions. The full D-Fuser linear style is available as an upgrade, these inboard modules have 6 diodes per head, which will increase cost, resulting in the brightest bar in its class.

Sectioned polycarbonate top shell eases serviceability / maintenance.

Depending on the size, the user will have the luxury of simply removing panels and having full access to the interior of the bar, making field service easier and faster than ever. These polycarbonate panels are UV stabilized, no cracking or discoloring even in the toughest conditions. A black polycarbonate base on a rigid aluminum platform ensures durability and years of trouble free service.

Features

Specifications:

Available lengths:
43", 49", 54", 60"

Dimensions:
Width: 13"
Height: 2.3"

Operating voltage: 12 VDC
Avg. current: 16A
Max. current: 32A

Harness:
Power: 15' / 14 AWG x 4 pcs.
Function: 15' / 22 AWG x 16 pcs.

Features:

- D-fuser linear optics
- Reflector optics (inboard only)
- LED takedowns & alley lights
- 10 user selected warning patterns
- Arrow patterns also available
- LED colors: Amber, Blue, Red, White
- Lens colors: Amber, Blue, Red, Clear

Mounting:

- Steel: Adjustable, Flat Narrow, Flat wide
- Composite: Standard

Vehicle specific strap kits

Certifications:

SAE J845, J595, J575

Warranty:

5 year limited warranty
