

# Interior Visor Lightbar

## Preserve the value of the vehicle.

Slick top vehicles are becoming more popular every day. Not only does it preserve the vehicle value by eliminating drilling a hole through the roof, it also allows for stealth operation / surveillance.

## Vehicle specific mounting bracket reduce installation time.

Vehicles that aren't on the road aren't doing their job, save time and money on installations and get the cars out there! Our vehicle specific brackets cut install time in half, and provide the most secure fitting without hampering officer visibility. Each unit comes standard with a shroud extender kit to fill those hard to fill spaces that come with some windshields.

### Available models:

Chevy Tahoe, Suburban  
 Chevy Impala  
 Chevy Caprice (coming soon)  
 Dodge Charger  
 Ford Taurus (coming soon)  
 GMC Yukon  
 Universal installation kit also available (not guaranteed to fit all vehicles)

## Linear optics provide wide angle light output.

Linear optics provide the punch of strobe, while retaining the resilience and performance of LED technology. Choose from the SV4 (40 diodes total) or the SV6 (56 diodes if TD's are used, 60 diodes if take downs are not used). Either model is the right choice! Take down modules are TLEDO4 heads, NOT linear.

## Full front windshield coverage.

With the exception of the rearview mirror area, the SV's cover the entire width of standard size vehicles. Why go with a model that has "dead spots", or modules aimed at odd angles when there's plenty of room on other areas of the vehicle for intersection lighting?

## Features

### Specifications:

Dimensions:  
 Length: 47" (includes harness that connects both sides)  
 Height: 1.38"

Operating voltage: 12 VDC  
 Max. current:  
 SV4 - 4.8A @ 12.8 VDC  
 SV6 - 6.5A @ 12.8 VDC

Harness:  
 15' / 14 AWG x 8 pcs.

### Features:

Extreme linear optics

LED take downs (optional)

25 User selectable warning flash patterns

9 User selectable take down patterns, or synch them with warning head pattern

LED colors: Amber, Blue, Red, White

### Mounting:

**Universal** (not guaranteed to fit all vehicles)

### Vehicle specific;

Chevy: Tahoe / Suburban, Impala  
 Dodge: Charger  
 GMC: Yukon

### Certifications:

SAE J845, J595, J575

### Warranty:

5 year limited warranty
